

*Responsive and Reliable*

We'll be there... We are equipped to handle electrical maintenance requirements before they become emergencies.

Our goal is to ensure electrical reliability, improve plant efficiency, and provide confidence to our clients that their electrical systems are well maintained.

To assist our clients in their emergency electrical needs, we have highly trained service truck drivers that are on-call 24 hours a day, seven days a week.

ESCO Electric Company, a tried-and-true company of 40-plus years, specializes in industrial and commercial electrical projects. With over 150 professional electricians and technicians on staff, and over \$2 million in state-of-the-art tools and equipment, we have the resources to always come through for our clients and take care of their facilities.

We employ licensed electrical engineers to work with clients to ensure that we adequately fulfill their electrical engineering and design needs. Additionally, our highly-skilled foremen, with ten-plus years of industry-experience, are equipped with laptop computers to enhance project management, and allow them to customize reporting from the field for our clients.
